Summary

Bibi Sipra, CPA, is a Senior Tax Manager who works with corporate tax departments and Big 4 firms on a contract, fractional and interim basis. She spent seven years at Ernst & Young in the Global Compliance & Reporting practice, rising from Tax Staff to Tax Senior Manager, and has taken on project-based engagements with multinational companies and Big 4 firms since 2023. Her corporate income tax experience totals more than ten years.

Her specialties are ASC 740 accounting for income taxes (income tax provision, deferred taxes, valuation allowances, uncertain tax positions, income tax footnotes), US federal and multistate corporate income tax compliance, US international tax (foreign tax credit and Form 1118, Section 904 loss accounts, income sourcing, BEAT, FDDEI (formerly FDII), GILTI, Forms 5471, 5472 and 8858) and Australian corporate tax for a multiple-entry consolidated (MEC) group. She also works under IFRS (IAS 12) for foreign-parented and private equity-owned groups.

Companies engage her for busy-season surge capacity, interim coverage of a Senior Tax Manager or Tax Director seat, post-acquisition and post-restructuring tax projects, provision insourcing, and technical special projects that would otherwise go to a Big 4 firm. Every contract engagement to date has ended with a full-time offer. She uses AI tools to build tax models and draft memos faster, and reviews and ties out every output herself.

Areas of expertise

Accounting for income taxes (ASC 740 and IAS 12)

Annual and quarterly income tax provision; effective tax rate analysis; deferred tax assets and liabilities;

US federal corporate tax compliance

Form 1120 consolidated returns; book-to-tax differences (Schedule M-3); fixed asset and

valuation allowance analysis and deferred tax asset reversal scheduling; uncertain tax positions (ASC 740-10, formerly FIN 48); income tax footnote and disclosure for Form 10-K, 10-Q and S-1 filings; purchase accounting and opening balance sheet tax entries; carve-out financial statements; stock-based compensation tax effects (ASC 718); return-to-provision true-ups; SOX 404 tax controls; PCAOB audit support; IFRS tax provision for foreign-parented groups.

US international tax

Foreign tax credit and Form 1118 (all schedules); Section 904 limitation, overall foreign loss (OFL), overall domestic loss (ODL) and separate limitation loss (SLL) accounts; Section 861 expense allocation and apportionment; Section 863(b) sourcing of inventory sales; GILTI (Form 8992); Subpart F; FDDEI (Form 8993, formerly FDII); BEAT (Form 8991); Section 267A hybrid rules; Forms 5471, 5472 and 8858; controlled foreign corporation reporting; transfer pricing coordination; Pillar Two awareness.

Australian corporate tax

Multiple-entry consolidated (MEC) groups; allocable cost amount (ACA) cost-base resets; capital gains tax events (ITAA 1997); Subdivision 768-G participation exemption; Division 230 taxation of financial arrangements (TOFA); intercompany loan write-offs; restructuring add-backs; coordination with the ATO position and the group's Big 4 advisor.

depreciation (bonus, Section 179, MACRS); Section 263A UNICAP; Section 163(j) interest limitation; net operating loss and Section 382 limitation; consolidated return regulations (Reg. 1.1502) including attribute allocation on deconsolidation; accounting method changes (Form 3115); transaction cost analysis; estimated payments and extensions.

State and local income tax

Multistate corporate income and franchise tax compliance; apportionment and sourcing methodologies; nexus analysis; unitary and combined filing; separate-company states; state NOL tracking; state addbacks; look-back refund reviews; high-volume return review in ONESOURCE Income Tax.

Leadership and delivery

Tax Account Leader on Big 4 client portfolios; review and sign-off of federal and state returns; management of US staff, offshore (GDS) teams and up to 12 direct reports; engagement budgets, margins, scope and fee negotiation; executive and audit committee communication; technical memo and workpaper design; AI-assisted model and memo development with full technical review.

Professional experience

Independent Corporate Tax Consultant

MARCH 2023 – PRESENT

Project-based, fractional and interim corporate tax engagements with Big 4 firms and multinational companies, administered through Korn Ferry and MBO Partners.

> ### Senior Tax Manager, US International and Australian Tax (contract)
>
> **APR 2025 – NOV 2025 · FEB 2026 – PRESENT**
>
> Global drilling services and products company — private equity-owned multinational, approximately US$1 billion in revenue, operating in Australia, North America, Latin America, Africa and Asia-Pacific.
>
> The first engagement covered the year the company went from public to private and ended with a full-time offer (declined). Re-engaged in February 2026 for special projects through November 2026, with an ad-hoc advisory role to follow.
>
> - Right hand to the Senior Tax Director on the IFRS income tax provision through the go-private transaction year, then on US international tax and Australian corporate tax special projects.
> - Built the income tax footnote from scratch for the newly created entities that house the acquisition's purchase accounting entries (IFRS permits no pushdown accounting): calculated the deferred taxes, reconciled the entries by entity and by jurisdiction to prevent netting errors, and passed audit with no adjustments.
> - Managed the IFRS-based tax provision through a transaction-year close under compressed deadlines and heavy auditor scrutiny.
> - Built a fully linked Form 1118 foreign tax credit limitation model (Schedules A through K across all separate categories) with automated tie-outs and a summary dashboard. Developed the template with AI assistance from the form instructions, with no client data in the tool, and reviewed and tied out every formula before use.
> - Built a Section 904 overall foreign loss, overall domestic loss and separate limitation loss allocation and recapture model following Reg. 1.904(g)-3, and reconstructed the group's ODL accounts back to 2018.
> - Analyzed Section 863(b) sourcing of toll-manufactured versus contract-manufactured inventory for foreign tax credit and FDDEI purposes, and the Reg. 1.1502-9 apportionment of loss accounts to a member leaving the consolidated group.
> - Managed a BEAT (Form 8991) analysis following a deconsolidation, reclassifying prior-year Schedule A items and drafting disclosures.
> - Prepared all calculations and disclosures for the Australian corporate income tax return, including controlled foreign company attributable income from the Australian parent's perspective.
> - Built the debt tracing calculation for Australia's new debt deduction creation rules (DDCR) from scratch in their first year of application.
> - Coordinated the Australian income tax return and restructuring add-backs with the group's Big 4 advisor.

Senior Tax Manager, Multistate Compliance (recurring seasonal contract via MBO Partners)

JUL 2024 – PRESENT

Deloitte, Multistate Tax, New York. Annual July-to-November state compliance season.

- Directed and mentored two engagement teams (11 and 8 professionals) preparing and filing more than 495 multistate corporate income tax returns in ONESOURCE Income Tax for companies with $12.4 billion to $50.5 billion in revenue.
- Researched industry-specific sourcing methodologies, group filing methodologies and nexus positions, producing $6 million in look-back state tax savings.
- Resolved complex state tax matters across diverse entities and affiliates and reviewed high-volume return packages before filing.

Senior Tax Manager, Tax Provision (fractional)

JAN 2024 – APR 2024

High-profile multinational sports media and entertainment company with legal entities across Asia-Pacific, EMEA, Latin America, Canada and the United States.

- Transitioned the end-to-end ASC 740 income tax provision from a Big 4 firm to an in-house model, cutting advisory spend 80% with no audit findings; primary contact for executive leadership and external auditors.
- Computed uncertain tax positions, valuation allowances by jurisdiction (including US deferred tax asset reversal scheduling against indefinite-lived intangibles) and ASC 718 stock compensation tax effects; validated global deferred taxes and income taxes payable and receivable.
- Led accounting, legal, treasury and external advisors through the income tax footnote for the annual financial statements; used data tools to shorten the close-to-provision turnaround.
- At the close of the engagement the company asked to move all of its tax work from its Big 4 provider to her.

Ernst & Young LLP

JAN 2016 – MAR 2023

Tax Senior Manager (August 2022 – March 2023) · Tax Manager (October 2019 – August 2022, early promotion) · Tax Senior (October 2017 – October 2019) · Tax Staff (January 2016 – October 2017)

Global Compliance & Reporting practice. Public, private and private equity-backed clients with revenues up to approximately $45 billion in manufacturing and distribution, consumer products and retail, technology, hospitality, insurance brokerage and pharmaceuticals. Ran the Tampa office's largest tax compliance engagement (more than 6,000 hours).

- Tax Account Leader on multiple accounts: direct contact for client executives, scope and fee negotiation, budgets and margin targets, billing and collections, and the pipeline for smaller pursuits.
- Final reviewer and sign-off on federal and multistate consolidated corporate income tax returns; managed up to five year-end provisions in a single cycle, including a public multinational.
- Led ASC 740 audit procedures for SEC filers (Form 10-K and 10-Q), a PCAOB audit tied to a public transaction, a pre-IPO S-1 registration statement and a first-year private equity carve-out audit: valuation allowances, uncertain tax positions, purchase accounting and information produced by the entity (IPE) documentation.
- Owned the global purchase accounting and opening balance sheet workstream for a $37 billion public distributor's acquisition, coordinating foreign component teams, M&A specialists and the assurance team across jurisdictions.
- Reviewed cross-border compliance (Forms 5471, 5472 and 8858; BEAT, FDII, Section 163(j), Section 267A) and advised clients through the Tax Cuts and Jobs Act, CARES Act and Inflation Reduction Act, including accounting method changes, transaction costs, debt modifications and tax controversy.
- Delivered a five-business-day year-end provision sign-off for two US subsidiaries of a global industrial group with more than $90 billion in revenue, streamlining the inherited testing approach to lower hours without sacrificing quality.
- Managed US staff, offshore GDS teams and up to 12 direct reports across five or more concurrent accounts; recognized in every review cycle for coaching and for keeping teams calm under deadline pressure.
- Improved engagement economics: identified out-of-scope work that produced a $100,000-plus fee write-up, completed a first-year compliance engagement earlier than the prior year at higher margin, and added state and global compliance billings not originally scoped.
- Facilitated technical tax curriculum at EY National Training for incoming tax professionals in Chicago.

Earlier career

2014

- **CBIZ MHM, LLC, Tampa** — Tax Intern, January 2014 – August 2014: 135 federal returns (Forms 1120, 1120-S, 1065, 1041 and high-net-worth 1040), Forms 5471, 5472, 8858 and FBAR, Section 263A, Section 179 and bonus depreciation.

Industries and company types served
